How does **TEAM** work for you?

- Flow Switches on Spray Equipment  
Senses product flow
- Styrene Monitoring Device  
Senses styrene in work zones  
Transmits signal to ventilation equipment  
control computer
- Ventilation Equipment Control Computer  
Monitors styrene levels  
Motor Speed Control  
Exhaust fans  
Make-up air units
- Air Flow Control Devices  
Duct dampers  
Air intake dampers  
Air discharge dampers

**FREES** is pleased  
to make available  
to the FRP Industry  
the **LATEST** in  
Styrene  
Monitoring Devices.

With the  
**T.E.A.M.S. SYSTEM**  
in place  
**YOU**  
have control.

**Frees, Inc**

introduces

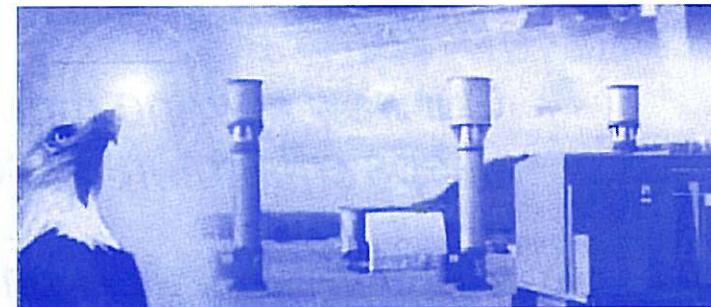

**T.E.A.M.S.**

**Total Environmental  
Air Management Systems**

from the Pioneers of

**FREES**

**Directed Air Flow System**

Currently Ventilation Systems  
are either 100% on or off.

**Now, for the first time,  
with TEAMS  
YOU have control.**

*Total Environmental Air Management Systems*

**T.E.A.M.S**

## *Join The Frees T.E.A.M. -- Total Environmental Air Management Systems*

- *Currently most ventilation systems are either 100% on or off.*
- *Our new styrene monitoring system keeps customers in compliance.*
- *A sensor indicates when styrene is not present and adjusts the airflow in building, resulting in 30% or more energy cost savings.*
- *FIT FAN is a low cost, effective, no heat ventilation system. Workers are more productive when they are comfortable.*

**Now,  
for the first time,  
with T.E.A.M.S.  
YOU  
have control.**
